Education

2023 - Present

Bachelors in Computer Science

Virtual University of Pakistan

2020 - 2022

A - levels

Sceptre College

2018 - 2020

O - levels

St. Paul's English High School

Expertise

- Tkinter
- SQL
- Looker Studio
- PowerBI
- Machine learning
- Matplotlib
- Data Analysis
- UI with Python
- Html and CSS
- Pandas
- Numpy

Languages

Python

Java

Aayan Ali

Data Scientist

Hi, I am Aayan Ali, Alevels passout in 2022 I started learning programming during my Alevels which was Python in 2021. After completing my Alevels I dived into Data science. It was not easy to dive in it, before choosing this field I was already exploring others like I've also tried Android Development, Ethical hacking, web development and C programming also. After all the attempts I then learned about Data science and I loved it as it includes Mathematics which is my favorite subject since primary school. I learnt Numpy, pandas, and visualization libraries also. I hope you liked my journey towards Data science.

Experience

- **Sep 2023 - Present**
Oasis Infobyte
Data Science Intern
- **Aug 2023 - Present**
Preply
Python Tutor
- **May 2023 - Aug 2023**
Technocolabs Softwares
Machine Learning Engineer Intern
- **Dec 2022 - Jan 2023**
Code Clause
Python Developer

Projects

Yellow Color detection

In this project I've used OpenCV and Numpy to detect yellow color object in the webcam and create a box around it.

<http://bit.ly/3GTqvlA>

Text Editor in Python

Here I used Python library Tkinter to make a simple text editor.

<https://bit.ly/48f9RZJ>

Heart Disease Prediction

I've created a Logistic Regression model to predict the whether the person has heart attack or not based on several factors like Age , Gender , Cholesterol level and so on.

<https://bit.ly/3twV8u6>

Customer Segmentation

In this model I've used K means to cluster customers based on different factors.
